Hiring Team
Hamro Patro
Kathmandu, Nepal

Subject: Associate Software Engineer Application

Dear Hamro Patro Team,

I'm writing to express my interest in the Associate Software Engineer role at Hamro Patro. As someone who has been deeply inspired by your work in the Nepali tech space, the opportunity to contribute to a platform used by millions is both exciting and motivating.

While I may not come with years of professional experience, I have spent the past several months immersed in real-world web development—building responsive UIs, managing state with React, and turning static designs into functional, engaging web interfaces. Through internships and personal projects, I've developed a solid foundation in HTML, CSS, JavaScript, and Git, and have been continuously improving my React skills through hands-on development and learning resources.

What I enjoy most is translating design ideas into smooth, usable, and accessible user experiences. I find great satisfaction in solving UI bugs, optimizing components for performance, and ensuring everything just *feels right* when a user interacts with the application. I believe these small details make a big difference, and I'd love to bring that mindset to your team.

I'm a fast learner, a good listener, and I genuinely enjoy collaborating with people who are passionate about what they do. I believe in clear communication, clean code, and continuous improvement. I'd be thrilled to grow alongside the experienced team at Hamro Patro while contributing with the enthusiasm and dedication I bring to everything I do.

Thank you for considering my application. I've attached my resume and would be happy to share code samples or project links if needed. I hope to hear from you soon and get the chance to contribute to Hamro Patro's mission.

Warm regards,

Anshul Rawal
